## WORK EXPERIENCE

### Sale Closer @Tell world solution

Sep 2022 – Mar 2023

Worked on the mobility campaign for Canada, consistently meeting and exceeding monthly targets through persuasive communication and customer relationship management.

### PHP Developer @DiscountPk

Aug 2024 – Mar 2025

- Maintained and updated a PHP-based e-commerce website, ensuring site stability and smooth operation.
- Fixed backend bugs and optimized performance, reducing load times and improving customer experience.
- Collaborated with a small team to deliver new features and enhance UI, boosting overall usability.

### Sales Specialist @Talk Tower solution

Mar 2025 – Aug 2025

Worked on the medical billing campaign for the US, consistently meeting and exceeding sales targets through effective communication and strong client handling skills.

### Frontend Developer @Snappybyte

Aug 2025 – Sep 2025

Worked on developing interactive web games, focusing on engaging user interfaces and smooth gameplay experiences.

### Sales Executive @Elite Techlogix

Sep 2025 – Present

Working on the insurance sales campaign for clients across the US, helping customers choose suitable insurance plans while ensuring a smooth and professional sales experience.

## PROJECTS

### Fashion Mane – Blogging Platform | [fashionmane.com](#)

Aug 2025

- Built a Full-stack blogging platform with built-in CMS and powerful admin panel (Judit React).
- Solved the challenge of manual blog updates by enabling full CRUD operations through the admin panel.
- Implemented dynamic, SEO-friendly routing for better discoverability.
- Added full-text search, categories, and tags to improve content organization and navigation.

### IPTV Subscription Platform | [supersubofficials.com](#)

July 2025

- Built a Full-stack IPTV platform with secure, subscription management, and payment integration.
- Solved the complexity of IPTV service access by enabling seamless explore, subscribe, and purchase flows.
- Delivered a responsive UI optimized for smooth user experience and efficient backend operations.

## COLLABORATIVE DEVELOPMENT

### React & Flask Integration (Jan 2025)

- Collaborated with a team to integrate React with Flask for a dynamic full-stack workflow.
- Solved the challenge of handling complex nested data by structuring and displaying it consistently across the UI.
- Implemented a polling mechanism to improve efficiency and prevent Heroku's 30-second timeout.

### DALL·E Image Handling (Feb 2025):

- Worked with the team to solve DALL·E image expiration issues by capturing images in real-time.
- Implemented a Python base64 conversion & database storage solution for efficient dynamic rendering in React.
